| JOSEPH R. SILER (Pittsburg, Kansas) AND RICHARD D. HILL<br>(Pocatello, Idaho)   |     |
| Reflectors on Vector Spaces . . . . .   | 1   |
| ENZHONG FU AND THOMAS L. MARKHAM (Columbia, South Carolina)   |     |
| On the Eigenvalues and Diagonal Entries of a Hermitian Matrix . . . . .   | 7   |
| RAJENDRA BHATIA AND TIRTHANKAR BHATTACHARYYA<br>(New Delhi, India)  |     |
| A Generalization of the Hoffman-Wielandt Theorem . . . . .  | 11  |
| ISAAH L. KANTOR (Lund, Sweden)  |     |
| Description of the Optimal Solution Set of the Linear<br>Programming Problem and the Dimension Formula . . . . .                  | 19  |
| MAGOLU MONGA-MADE (Brussels, Belgium)   |     |
| Analytical Bounds for Block Approximate Factorization Methods . . . . .   | 33  |
| ARIEH LEV (Tel-Aviv, Israel)  |     |
| Products of Cyclic Conjugacy Classes in the Groups $PSL(n, F)$ . . . . .  | 59  |
| GEORGE-OTHON GLENTIS AND NICHOLAS KALOUPSIDIS<br>(Athens, Greece)   |     |
| Efficient Algorithms for the Solution of Block Linear Systems<br>With Toeplitz Entries . . . . .                                  | 85  |
| D. A. GREGORY, S. KIRKLAND, AND N. J. PULLMAN<br>(Kingston, Ontario, Canada)  |     |
| Power Convergent Boolean Matrices . . . . .   | 105 |
| MIROSLAV FIEDLER (Czech Republic)   |     |
| Structure Ranks of Matrices . . . . .   | 119 |
| MIROSLAV FIEDLER (Czech Republic) AND<br>THOMAS L. MARKHAM (Columbia, South Carolina)   |     |
| A Characterization of the Moore-Penrose Inverse . . . . .   | 129 |
| WENCHAO HUANG (Madison Wisconsin)   |     |
| On the Sandwich Semigroups of Circulant Boolean Matrices . . . . .  | 135 |
| MASATOSHI FUJII (Osaka, Japan), TAKAYUKI FURUTA (Tokyo, Japan),<br>AND EIZABURO KAMEI (Osaka, Japan)                              |     |
| Furuta's Inequality and Its Application to Ando's Theorem . . . . .   | 161 |
| XIAO-WEN CHANG AND JIA-SONG WANG<br>(Nanjing, People's Republic of China)   |     |
| The Symmetric Solution of the Matrix Equations $AX + YA = C$ ,<br>$AXA^T + BYB^T = C$ , and $(A^T XA, B^T XB) = (C, D)$ . . . . . | 171 |
